

National Severe Weather Warning Service

Chief Forecasters Assessment

A slow moving frontal zone and strong southeasterly winds will lead to persistent and often heavy rain across much of Angus and Perthshire through Thursday and into Friday morning, with snow accumulating above 500-600 metres. Rainfall totals of 20-30 mm are expected widely, with in excess of 50 mm expected over southeast facing slopes.

The Met Office have issued an **Amber Warning of Rain**

Valid from **15:00 on Thu, 20th Dec 2012** until **12:00 on Fri, 21st Dec 2012**

Persistent heavy rain is expected across much of Angus and Perthshire during Thursday and overnight into Friday morning. The public should be prepared for an increased risk of both surface water and river flooding as well as disruption to travel.
